# Just One Extra Litter

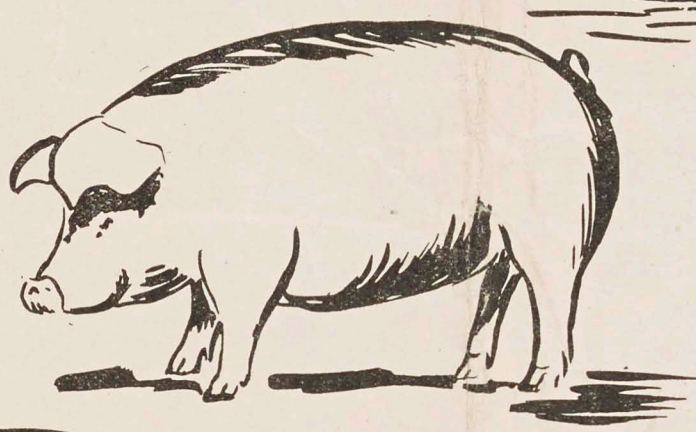

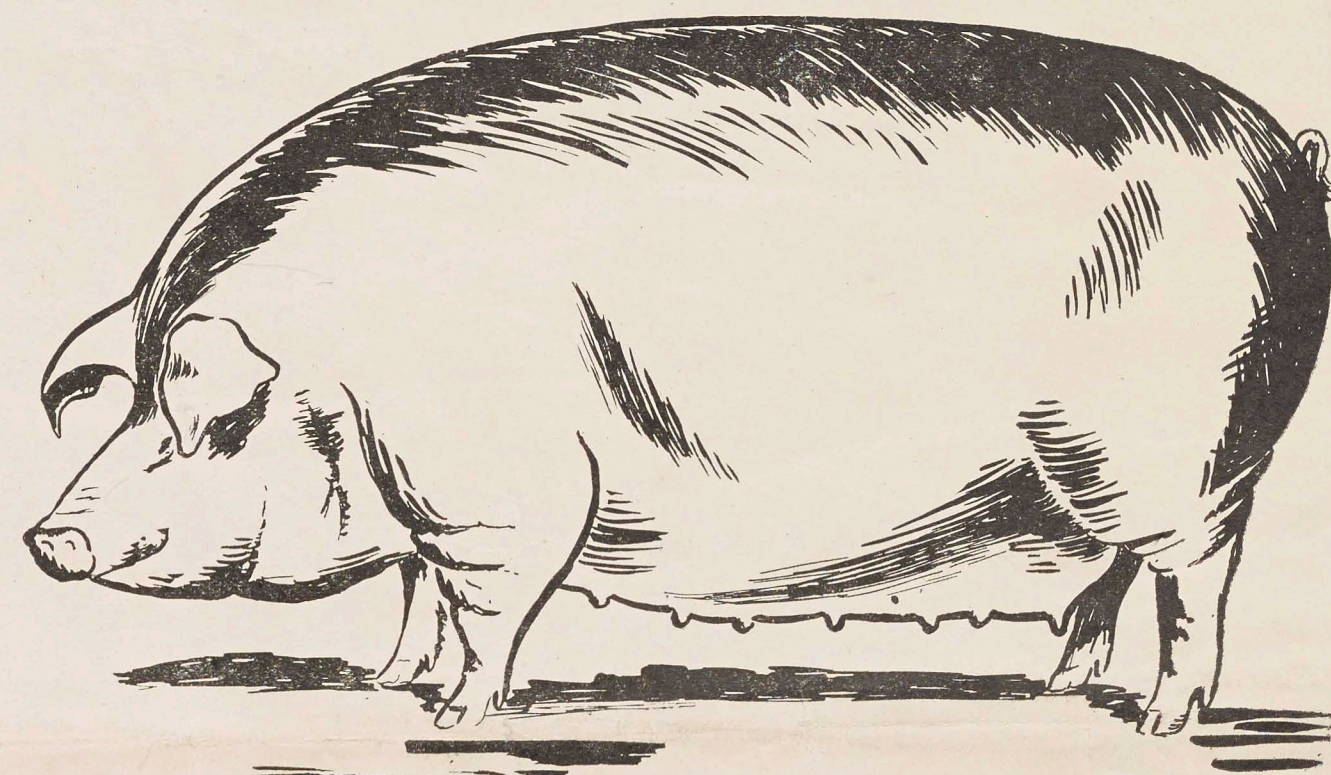

THE UNITED STATES  
FOOD ADMINISTRATION

*Announces as One of Its Purposes:*

"To see that the producer at all times can count on a fair price for his hogs so that pork production will be profitable to him. \*\*\*

"For the pigs farrowed next spring we will try to stabilize the price so that the farmer may count on getting for each 100 pounds of hogs, ready for market, thirteen times the average price for each bushel of corn fed to the hogs."

## HELP WISCONSIN DO HER SHARE

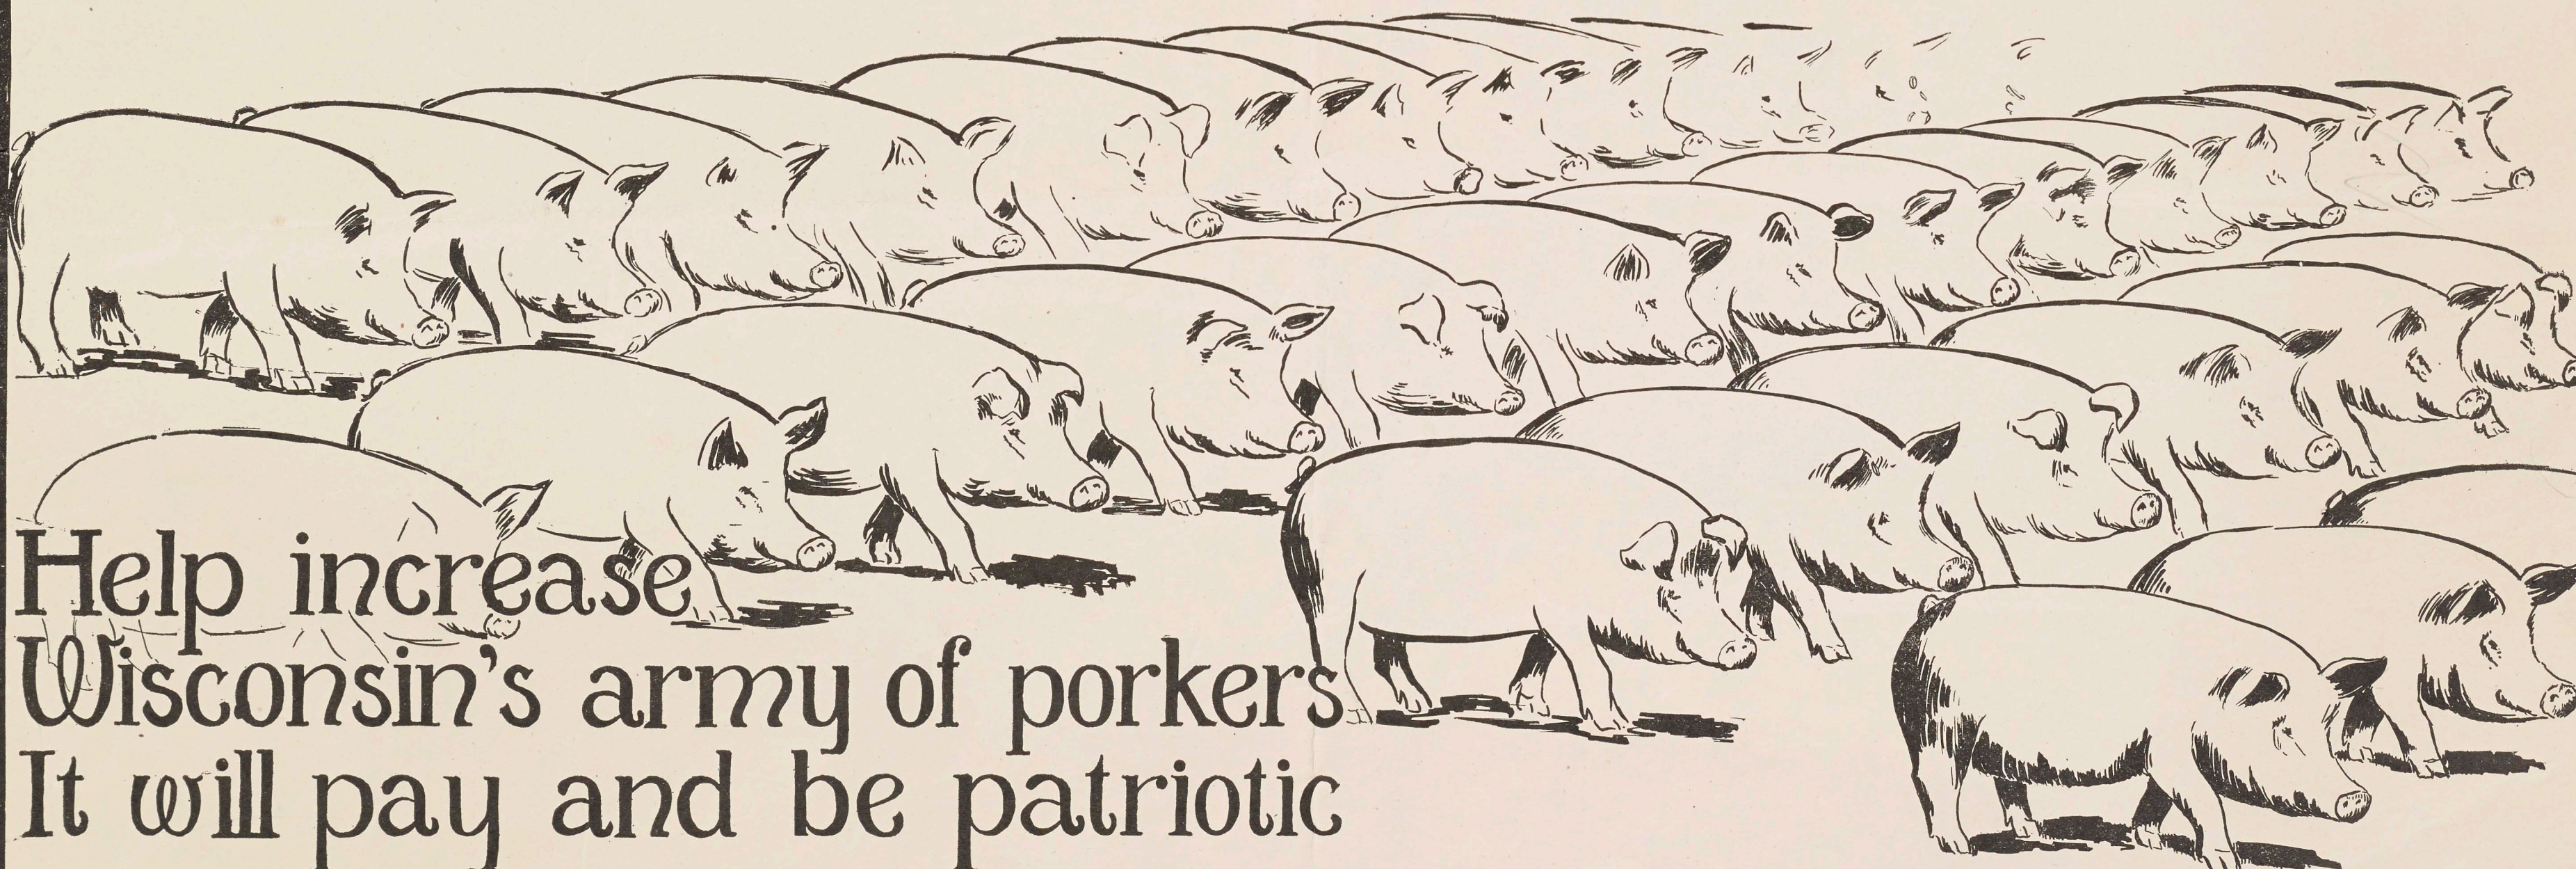

### *An Army of Porkers?*

If an extra litter is kept on every farm in the state—Wisconsin's supply of pork will be increased at least fifty per cent.

❖ **Help?** Let the boys and girls care for the extra litter. They will be glad to *help*.

❖ **Feed?** Plan now to feed the pigs next summer an abundance of good forage—rape; clover; oats, peas and rape; oats and peas, and other pasture crops. This will help out the grain feeds and cheapen the cost of pork.

**Market?** There is a world-wide shortage of pork and pork products. America and the Allies will need every pound of pork that we can produce. Well managed pork production this year will pay, and it will be patriotic. Send for the circulars on pork raising to be published by the Agricultural Experiment Station, Madison, Wisconsin.

Help increase  
Wisconsin's army of porkers.  
It will pay and be patriotic

Prepared under the direction of the State Council for Defense by the  
Agricultural Experiment Station, The University of Wisconsin, Madison
